Agenda

9:00 am-11:00 am: Swagelok Safety Installation for Fittings, VCR and Thread Identification

This seminar is intended to familiarize end users and purchasing professionals about the proper use of tube fittings and VCR fittings installation, trouble shooting and mechanical function of the fittings are discussed. We will familiarize students with techniques to identify threads.

11:00 am-12:00 pm: Swagelok Valve Selection & Safety Installation

This seminar is intended to familiarize end users and purchasing professionals about valve selection, evolution of design, design advantages, and installation.

12:00 pm-12:30 pm: Swagelok Hose Safety & Installation

This seminar is an overview of hose products available in industry and how to properly install, troubleshoot and assemble hoses on site

12:30 pm-1:00 pm: Lunch

1:00 pm-2:00 pm: Swagelok Regulator Safety & Selection

This seminar is an overview of common regulator types and will also discuss proper operation, sizing, and safety concerns.

2:00 pm-3:30 pm: Swagelok Tube Bending

This seminar will discuss proper setup of the Swagelok Tube Bender, layout, and bending techniques. The user will be exposed to tube bending techniques that will allow them to install tubing runs more efficiently and confidently.

What do attendees receive?

- Hands-on training
- Installation handbook
- Certificate of completion

What does your company receive?

- More knowledgeable technicians
- Cost savings achieved by less leakage, fewer mistakes, fewer wasted parts, better performance and longer life from your fittings

Location: 2732 Vassar Place, Ste. A.
