

SWAGELOK[®] HOSE ADVISORS

Engineered to take the pressure off of you.

Unplanned downtime.
Repeated hose replacement.
Loss of profits.
Safety incidents.

Failed hose assemblies require time and resources you just don't have. It's better to be prepared by taking a preventative approach. Let Swagelok Hose Advisory Services help.

From reduced maintenance costs and extended hose life to increased safety, we're here to take the pressure off of you.

Swagelok

Swagelok Hose Advisors can help you:

Drive Facility Efficiencies

Save time and resources while being able to focus on more pressing priorities.

Reduce Plant Maintenance Costs

Prevent costs associated with continuously replacing the same problem hoses, unplanned downtime and wasted product.

Extend Hose Life

Save money through proper hose selection and installation, because an optimally routed hose and end connection combination will have a longer life.

Master Hose Maintenance

Better predict when systems will need attention and understand what steps are necessary to keep everything running smoothly with a customized preventative maintenance schedule.

Increase Safety

Keep your plant and processes safe, predictable and dependable with leak-tight products and best practices to reduce the risk of injuries and environmental damage.

End Connection Damage

Excessive Cover Damage

Kinking Damage

What to expect from Swagelok Hose Advisors:

- A thorough discussion of your facility's goals.
- A visual analysis of all hose systems.
- A detailed, expert-reviewed report.
- Prioritized improvement recommendations and suggestions with replacement options.
- Preventive maintenance schedules and hose inspection recommendations for your specific facility.
- A hose register update with our survey findings or creation of a new database, depending on your facility's needs.
